CEMENTOUS

Cementous collection feature a seemingly unfinished, concrete effect that strips away all airs of pretension and excessiveness, thereby unlocking the beauty in its essence. Though edgy, the glossy-like surface and neutral colour scheme soften its intensity, allowing it to look refined without being overly formal. With a utilitarian quality, Cementous tiles make a great protagonist of any contemporary spaces – perfect for completing that cosmopolitan appearance with character.

Raw and so- "In-trend". That's the reason why we love Urbane Collection. Cement-look tile brings you the industrial style of concrete with the benefit of widespread usage and no need to worry about the cracks in the future. This new collection is versatile that is natural & trendy at the same time. The result is astonishingly beautiful and refreshing.

CONTI-FLOW

Tile Laying

Come in a curated selection of marble and stone patterns that are dominating the current interior trend, every design comprises four types of tile flowing veins that can be seamlessly pieced together.

The ambition is to create a continuous, fluid flow that is narrative resembling that of large-format stone slabs. Homeowners can thus easily create a new kind of interior landscape with Conti-Flow, experiencing the visceral excitement of full-format stone in all its glory.

Legacy is designed after the pattern inspired by Cipollino Marble, an Italian stone from Tuscany – a metamorphic rock that comes with thick, wavy veins and crystalline. The design articulates the depth and durability where both offer an exceptional aesthetic characteristic of Italian Stone. This tile collection consists of 3 colours, 2 sizes and it comes with Matt and Slip-Stop surface that is practical when applied at areas that are prone to water accumulation.

MURALE

Sporting the appearance of quartzite stones, Murale brings a modern aesthetic with timeless appeal. The pattern is similar to that of marble's swirls, but with a streakier texture that is sure to garner visual interest no matter where it is applied. With its mesmerizing veins of grey winding through to pristine white and moody dark, Murale is some kind of magic.

As its name suggests, Legnix is inspired by natural aged wood at the serene tropical forest. This design resembles a wood that has been exposed to rain and sun ray over time, makes it more majestic. Legnix Collection adds warmth, sophistication to any space. Also, this look offers the same exceptional durability for which tile is known and captures the essence of real wood.

TILE INSTALLATION

With so many different styles, colours, patterns, surfaces and sizes, how to select the 'right' tile?

DURABILITY & PERFORMANCE:

Refer to technical standards and PEI classification. This allows you to choose the right tiles for your application or environment, interior or exterior residential use or commercial setting.

CHOOSING A SIZE:

Tiles are available in many sizes. The recent trend has been towards larger tiles for floor and wall applications. Larger tiles make a room more spacious.

RULES OF COLOUR:

Lighter colours make a space appear larger. Darker colours add warmth. Neutral colour allow you to change your accessories but if you love trendy colours, go for it! Just keep in mind it will be with you a long time.

TILE FINISHES:

Choosing the right tile surface is important for your environment. Matt or honed tiles are suitable for living, dining, kitchen and bathroom as they are less slippery compared to smooth or shiny polished tiles. Polished surface is more suitable for living and dining area, while structure surface will be suitable for bathroom and outdoor application.

CHOOSING A GROUT:

Grout is available in a wide variety of colours. Using a grout which matches the tile tends to make the grout lines disappear. Using a contrasting colour makes the individual tiles stand out.

TILE CARE

	STAIN	RECOMMENDATION
Food Groups	Soy sauce, Coke, Coffee / Tea, Juice, Beer / Wine, Ice Cream, Ketchup	Alkaline base detergent.
Oil & Grease	Vegetable, Mineral, Petroleum	Alkaline base detergent.
	Wax, Rubber	Scrape off then use solvent turpentine follow by alkaline base detergent
	Lipstick / Shoe Polish	Alkaline base detergent
	Paint (oil based)	Turpentine or thinner
	Ink	Solvent such as turpentine or thinner
	Mortar	Acidic base detergent
Marker	Rust stains	Diluted Hydrochloride acid or acidic base detergent
	Felt Pen	Thinner
	Methylene Blue	Alkaline base detergent
Tile Grout	Crayon	Scrape off then use solvent turpentine follow by alkaline base detergent
	Cement	Diluted Hydrochloride acid
	Latex or Polymer	Solvent such as turpentine or thinner
	Epoxy	Scraper to scrape it off

INFORMATION

Sharing our expertise and knowledge

TILE INSTALLATION

The surface must be clean, smooth, dry and free of wax and grease. Areas that damaged or uneven must be patched or leveled.

Layout mark the center point of all four walls or the floor. First of all, layout the tiles to minimize the number of cut tiles.

Use tile spacers for each tile set to leave equal joints between tiles. We recommend a minimum tiling gap of 3 mm. The setting time will vary from a few hours to few days and depends on the type of material or adhesive used for installation.

When grouting, remove tile spacers and spread grout on the tile surface using a rubber grout float or squeegee. Important that you refer to adhesive package to specific instructions or precautions.

Remove excess grout from surface immediately after grouting. Wait for a couple of minutes, depending on the specific instructions, and then remove excess grout from surface with damp sponge, clean grout residue and smooth the grout joints.

TILE CARE AFTER INSTALLATION

Initial cleaning immediately after floor installation is essential and important to remove all mortar, sand and grout residues that may be left.

Niro Granite, the Swiss-Quality tile can be cleaned by scrubbing the installation with clean water and a neutral detergent and with a thorough rinsing.

If grout residue still remains, further cleaning of the tile can be accomplished by using a grout remover. Equipment recommended for more aggressive cleaning are floor scrubbers or floor buffering machines equipped with a nylon pad or brush. A wet vacuum should be used to pick up suspended grout residue and construction dirt completely.

Caution should be exercised when using acid or acid-based cleaners as they can adversely affect the grout. Avoid using hydrofluoric acid to its compounds, according to UNI-EN 176.

If acid is used for cleaning the installation, caution to use diluted sulfuric acid or diluted hydrochloric acid mixed in a correct mixture or concentration. It is important that before the acid solution is placed on the floor, the grout joints be thoroughly saturated with water first. Installers should wait until the grout joint has fully cured, usually 7 to 10 days before using acidic cleaners.

SHADE VARIATION

UNIFORM FROM TILE TO TILE

The range of colours and tones within the same shade is relatively uniform from tile to tile.

Minimal to no difference among pieces from the same production run.

SLIGHTLY NOTICEABLE FROM TILE TO TILE

The range of colours and tones within the same shade is slightly noticeable from tile to tile.

Clearly distinguishable differences in design or pattern with similar or slight change in colour tones.

MODERATELY NOTICEABLE FROM TILE TO TILE

The range of colours and tones within the same shade is moderately uniform from tile to tile.

Clearly distinguishable differences in design or pattern.

DISTINCTLY NOTICEABLE FROM TILE TO TILE

The range of colours and tones within the same shade is distinctly different from tile to tile.

Random colour differences from tile to tile, so that one tile may have totally different colour from that on other tiles. Final installation can be unique.

b. Household chemicals and swimming pool salts	ISO 10545 -13	Visual Check	Minimum B	Class A ≥ Class B (For Polished Tile)
Stain Resistance				
a. For unglazed tiles	ISO 10545 -14	Visual Check	Test Method Available	> Class 3
b. For glazed tiles	ISO 10545 -14	Visual Check	Min Class 3	> Class 3
Slip Resistance (Excluding Polished, Lappato and Matt Satin finishing)	AS/NZS 4586 App. A	P0 to P5	Manuf. to State	Wet Pendulum ≥ P2 (Dependent on product type)*

The technical specifications is only for rectified tiles. * Refer to test report for specific test result.

Each different tiles series are produced to meet different performance requirements. For specific performance, please request from Niro Granite sales team or their agent or distributor.

Colour Variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples. Colour, shade and glaze variations may exist due to the inherent characteristic of porcelain tile.

Due to low porosity of porcelain tiles, an Improved High Performance Cementitious adhesive in accordance to BS EN 12004 & ISO 13007-1 is highly recommended for proper installation. Products that meet this standard are available amongst leading adhesive manufacturers. Please seek expert advice from adhesive manufacturers for proper selection and application.
