# avant-garde local collection

*Discover True Indonesian Craftsmanship*

It's not talking about a product with sophisticated technology,  
It's talking about a making process...

How we process it... (Thought of ideas, materials, craftsmanship)  
Realizing ideas into tangible form, shape of tiles that represent local wisdom,  
Empowering local craftsmen and use traditional techniques of making tiles,  
the "GREEN" value.

Using local materials, it dries under sun light, then utilize  
rice straw of harvest residue to burn the tiles.

Our handmade tiles really are made by hand!  
Use human skill and laborious process, instead of machine.  
That is the secret of the beauty of handmade tile.  
The quality of 'perfect imperfection' cannot be compared  
by machine made equivalents

Most of design concepts of our collections are inspired by "Traditional Batik"  
and "Indonesian Traditional Ornaments".

100% of these collections are made in Indonesia

## INSTALASI VeNUS TILES PORCELANTO

---

- 1.Untuk pemasangan granite tiles dengan warna dan ukuran yang sama dalam satu area, pastikan kode "tipe produk", "kode produksi" dan "tanggal produksi" yang tertera pada masing-masing box harus sama.
- 2.Gelarlah terlebih dahulu untuk melihat kesamaan *shading* ( warna ) dan juga pastikan kerataan permukaan tile dengan cara mempertemukan kedua sisi permukaan tile secara berhadapan ( mengacu pada spesifikasi teknis produk, SNI-18070545-2 )
- 3.Lantai atau dinding kerja harus sudah di *screeed* ( untuk lantai ) atau diplester ( untuk dinding ) dengan kondisi water pass rata dan dalam keadaan bersih. Selama pekerjaan pemasangan sebaiknya tidak ada pekerjaan lain ( plafon, cat, listrik, plumbing, dll ) untuk aplikasi ( pada lantai atau dinding outdoor atau indoor atau wet area ) disarankan menggunakan semen instan atau tile adhesive untuk mendapatkan hasil yang optimal ( karena memiliki daya rekat yang tinggi ) sehingga tidak mudah popping atau lepas.
- 4.Kemudian letakan tile yang akan dipasang diatas adukan ( Pola pemasangan mengikuti arah panah atau logo yang tertera disisi belakang tile ). Atur nat dengan menggunakan spacer untuk membuat jarak nat, jarak nat yang disarankan sebaiknya ±2 mm untuk polished tiles ( mengkilap ) dan ±3 mm untuk unpolished ( tidak mengkilap atau bertekstur ), gunakan waterpass untuk mengukur kerataan lantai.
- 5.Bersihkan dengan segera permukaan tile dari sisa bahan adukan atau adhesive yang menempel ( dibersihkan setiap ±3 m<sup>2</sup> lantai terpasang ) dan diamkan min. 1 x 24 jam sampai mengering. Setelah itu dapat dilakukan pengisian nat. Pembersihan dilakukan dengan menggunakan kain lembab yang bersih.

Selama masa pemasangan dan masa perawatan, hindarkan zat atau cairan yang mengandung kimia dan bahan pewarna yang kuat ( teh, kopi, tinta, dll ), jika hal ini terjadi harus segera dibersihkan.

### Pengisian Nat atau *Grouting*

1. Sebaiknya dilakukan 1x24 Jam setelah pemasangan Granite tiles pada lantai atau dinding selesai. Sebelum pengisian nat dilakukan, bersihkan tiles dari debu/kotoran/minyak terutama pada celah nat.
2. Aplikasikan semen pengisi nat/grout secara merata.
3. Gunakan bahan karet atau spon pengisi nat lalu tekan sampai celah nat terisi padat dan permukaan nat berada lebih rendah dari permukaan tiles.
4. Bersihkan segera sisa grout yang menempel pada permukaan tiles dan diamkan 2 x 24 jam sampai grout mengering.

## INSTALASI VeNUS TILES MOSAICO ( Wet System / Tile Adhesive )

---

1. Pastikan kode atau seri dan tipe yang ada dibalik kemasan sudah sesuai atau sama antara satu dengan yang lainnya. Kecuali untuk mosaic yang customize hal ini agar menghindari terjadinya shading ( belang ).
2. Susunlah terlebih dahulu mosaic sesuai dengan gambar yang diinginkan ( di gelar sebelum terpasang ), terutama jika mosaic tersebut adalah tipe customize. Pastikan media yang akan diaplikasikan dalam kondisi sudah  
•Untuk aplikasi dinding plesteran, pastikan permukaan dinding tersebut sudah rata ( rata jidar ) dan tidak kopong.  
•Jika permukaan dinding yang sudah di cat, pastikan cat tersebut sudah dikupas bersih terlebih dahulu.
3. Ukurlah area aplikasi, dan buatlah moulding atau tarikan tali atau kepalaan untuk memastikan kesesuaian ukuran mosaic yang akan diaplikasikan pada area tersebut. Jika terdapat kelebihan ukuran mosaic terhadap bidang aplikasi, diharapkan tidak memotong chip mosaic, bila kondisi tersebut terjadi, gunting jaring pada mosaic tersebut, kemudian jarak nat antara chip mosaic yang satu dengan yang lainnya disesuaikan dengan ukuran bidang aplikasi, misalkan dibuat agak lebar atau menyempit pada selangkah area terakhir.
4. Karena sifat adukan semen instan atau adhesive lembut mengering, penempelan pada dinding, gunakan penahan untuk lembaran mosaicnya agar tidak turun ( konsultasikan ke pihak technical support ).
5. Setelah selesai proses instalasi tunggu 1x24 jam, baru dapat dilakukan proses grouting atau pengisian nat.

\*Tidak semua tipe mosaic dapat diaplikasikan dengan wet system, keterangan lebih lanjut hubungi PT. Venus Ceramica International.

### Pengisian Nat atau *Grouting*

- 1.Tentukan warna grout sesuai jenis mosaic
- 2.Lakukan *grouting* secara merata dan padat, ketinggian nat sebaiknya dibawah posisi permukaan mosaic.
- 3.Bersihkan segera sisa-sisa grout yang tersisa di permukaan mosaic, jangan biarkan sampai mengering.

Catalan :

- Untuk grouting tipe mosaic dengan permukaan tekstur lakukan *grouting* secara hati-hati jangan sampai sisa grout menumpuk diatas permukaan teksturnya.
- Untuk pemasangan mosaic secara non permanen harap konsultasikan ke bagian technical support PT. Venus Ceramica International.

 <b>WALL TILE</b>	Jenis material untuk aplikasi di dinding
 <b>FLOOR TILE</b>	Jenis material untuk pemasangan di lantai
 <b>SPESIFIC FLOOR APPLICATION</b>	Aplikasi material lantai hanya direkomendasikan untuk area tertentu
 <b>WET AREA</b>	Aplikasi material hanya untuk area basah yang tidak terendam
 <b>DRY AREA</b>	Aplikasi material hanya untuk area kering
 <b>SUBMERGED AREA</b>	Aplikasi material untuk area terendam
 <b>HAND MADE</b>	Pembuatan material dengan teknik sederhana non-pabrikasi
 <b>IN DOOR AREA</b>	Jenis material untuk aplikasi area di dalam ruangan & suhu ruang
 <b>OUT DOOR AREA</b>	Jenis material untuk aplikasi area luar ruang
 <b>PRIVAT AREA</b>	Jenis material untuk aplikasi area privasi, non-traffic
 <b>PUBLIC AREA</b>	Jenis material untuk aplikasi area publik/umum
 <b>NON HEAVY TRAFFIC AREA</b>	Jenis material aplikasi area publik terbatas di kondisi yang tidak ekstrem
 <b>DO NOT USE CEMENT BASE ADHESIVE</b>	Tidak direkomendasikan penggunaan perekat tile dengan bahan semen
 <b>GLAZED SURFACE</b>	Permukaan material terlapisi dengan glasur
